

Business Objects License Compliance made easy with INTEGRITY!

The solution today is INTEGRITY, a simple to use software specifically designed to give you a complete view of your SAP Business Objects licenses in just a few clicks.

In the past the ability to accurately account for and to ensure license compliancy has been a difficult and tedious task.

- INTEGRITY is the automated quick and easy solution to ensure compliancy with your Business Objects licenses.
- INTEGRITY is Business Objects certified, It works with BO5.x, 6.x, XI R2 and XI 3.x. and enables you to have a full control of your licenses.

Let us show you how easily it is to manage, prepare and audit your Business Objects licenses cost effectively.

Easily count for each of your BusinessObjects products the number of users allowed to logon, read and create or any kind of other security access.

- Total named/simultaneous/active/dormant users
- Total users allowed to logon to X applications
- Total users allowed to use Y modules
- INTEGRITY will scan all kind of allowed/denied security commands.
- CPU usage.

Sample licenses matrix result:

	Total Users	Designer	Supervisor	Business Query	BO Infoview	BO Reporter	BO Explorer	BO Webi Infoview	Webi Reporter	Webi Explorer	BCA
Total Active Users BO5 or BO6	45	4	4	18	20	19	19	2	2	2	1
Total	45	4	4	18	20	19	19	2	2	2	1

	Total Users	Designer	Deski Reader	Deski Creator	Deski Explorer	Infoview Reader	Webi Creator	Webi Explorer	Webi Interactive	Scheduled documents
Total Active Users BOXIR2 or BOEXI3	48	2	20	19	19	2	2	2	40	Yes
Total	48	2	20	19	19	2	2	2	40	Yes

INTEGRITY provides all the materials you need to efficiently count all your deployed BO licenses.

This solution works for any kind of BO deployed repository: BO5.x, 6.x, XI R2 & XI 3.x.

It also works on any Operating System; no matter you deployed your CMS on UNIX/Windows and on any repository database.

It tracks named users and CPU.
