

Securely backup your entire Business Objects repository

- Schedule the FULL backup of your SAP BOE platform (documents, universes, groups, security, users and all their objects ...).
- Schedule Business Objects backups using ControlM or Dollar Universe.
- Keep several versions of the backup content (only modified content is backup – delta mode).
- Non intrusive and web based solution. No matter how big your SAP Business Objects deployment is.

Selective restore of your SAP BOE platform content

- Restore of any version is just a mouse click away.
- Restore even lost or corrupted content (like a personal user document deleted by mistake) using our unique Recycle Bin feature. Setup a powerful OOPS strategy.
- Undo administration tasks done by mistake only by restoring previous version of content.

Keep control over your BO deployments

- 360plus provides many more features including:
 - Manage multiple BOE environments at once.
 - Compare different CMS.
 - Drag and drop content between CMS.
 - Schedule objects migration between BOBJ platforms.

Backup your entire SAP BOE platform

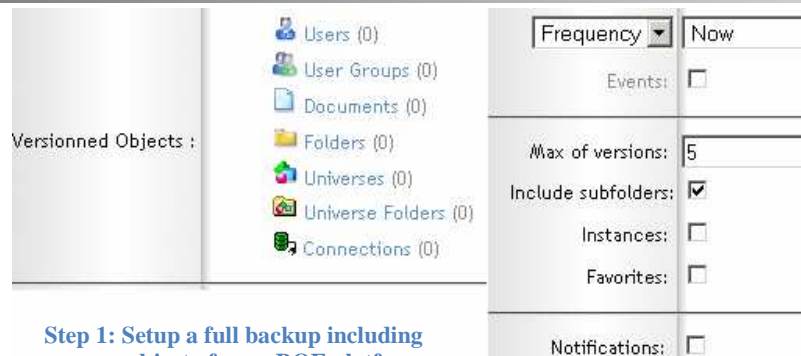

Add a plus managing your BOE deployments

360plus for SAP Business Objects XI3 and BI4:
An intuitive way to securely backup your BOE platform and restore peacefully any element including deleted ones.

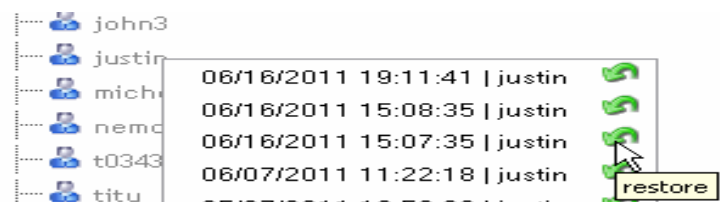

Why choose 360plus like almost 200 customers around the world?

Backup your BOE platform data is easier and safer.

See 360plus in action on YouTube
